Art Wizards

Thursdays, 2:30 pm - 3:30 pm, Room 8
\$221 - 12 sessions

January 16th – April 9th
No class February 20th

In Art Wizards, kids learn to draw the things that kids find exciting. That's where we start. We give them all the information they need to be successful, but not so much that we stifle their imagination or limit their opportunities. They learn that a problem can have more than one solution, that small changes can have a big effect, and that there is more than one way to look at the world around them. With consistent and ongoing practice throughout the school year, our students are amazed at the progress they make. Projects include fish, birds and animals of all kinds, people, landscapes, still life, mythical creatures, movie characters and cartoons. We show them how to break down a scene or character so it comes out looking like what they intended. We show them how easy it can be when they know how to use chalk and oil pastels, when it's better to use colored pencils and where markers and watercolor fit in. It's easy! It's exciting! It's rewarding! And it has a super-positive effect on all other subjects. **K - 5th Grades. Class minimum: 12. Class Maximum: 24.**

Creative Coding: Level Up!

*Wednesdays, 1:15 pm – 2:45 pm, Computer Lab
\$405, 11 sessions*

*January 15th – April 8th
No class Jan. 29th & Feb. 19th*

Coding gives your kids power over their world. In our class your child can create their own playable computer games & animations, based on their own ideas! And now, they'll run on any internet-capable device, even tablets, so they can show them off to their friends! Woah.

This class is open to all 3rd through 5th graders, including brand-new students. For 2020, we've renamed our core class to highlight something returning students already know: Creative Coding classes are designed to be repeated as many times as desired, and each time your child completes a CC class or summer camp, they "Level Up!" just like in video games.

Yet, each class day is unique. An ever-changing mix of challenges & hacks will inspire & supplement your child's own projects, which they'll get to show in a presentation for parents at the end of the class! Beginners will spend the first few lessons learning the basics of coding and how to use Scratch before diving into their own projects.

All the while, they'll continue to increase their skills and capacity for persistence, through the individual assistance of our awesome instructors.

Your child will have so much fun, they'll hardly realize how much they're learning.

3rd – 5th Grades. Class Minimum: 6. Maximum: 14.

Junior Coding

*Mondays, 2:30 pm – 4:00 pm, Computer Lab
\$405, 11 sessions*

*January 13th – April 6th
No class Jan. 20th & Feb. 17th*

Give your child a gift that will last- get them introduced to coding with our highly-regarded and FUN Junior Coding class! This class for 1st and 2nd graders features a mixture of creative play and guided learning activities using touchscreen tablets (provided). We use Scratch Junior to teach "real coding" at an age-appropriate level using a pictorial drag-and-drop interface. Your child will smile, laugh, struggle, and ultimately triumph as they progress through our curriculum of increasingly complex challenges. Through fun and creative exercises, they'll develop computational thinking skills and build persistence. At the end of the class, every student will get to present the project they are proudest of to their friends, family, and classmates. **1st – 2nd Grades. Class Minimum: 6. Maximum: 14.**

TGA Premier Junior Golf

Fridays, 2:30 pm-3:30 pm, Gym
\$253, 12 sessions

January 17th – April 10th
No class February 21st

Discounted Prices of \$238 for each additional sibling and \$449 for both golf & tennis

TGA Premier Junior Golf brings the golf course to your school! Our national, award winning, 5 level program is specially designed for children and builds upon the educational concepts they are learning in the class room. Fun comes first in every TGA class, but our curriculum also focuses on instilling self-confidence and life values through professional golf instruction. Students learn the fundamentals, etiquette and rules of the game. Best of all, we provide all the equipment and training materials so children of all skill levels have the chance to come out and tee it up with TGA! **K-5th Grades. Class minimum: 5. Maximum: 22.**

TGA Premier Junior Tennis

Mondays, 2:30 pm - 3:30 pm, Gym
\$232 - 11 sessions

January 13th – April 6th
No class Jan. 20th & Feb. 17th

Discounted Prices of \$218 for each additional sibling and \$449 for both golf & tennis

TGA Premier Youth Tennis is bringing the tennis court to Laurelhurst! TGA, in national partnership with the United States Tennis Association, co-designed a tennis enrichment program that focuses on athletic, academic and character development for children. The TGA curriculum uses tennis equipment that is modified to be size appropriate and safe, so we can turn the school gym into a tennis court. In addition to professional tennis instruction, your child will take part in a combination of physical fitness for health benefits and academics such as math, science, language and social studies for educational development. Every class focuses on social interaction, developing positive character traits and most importantly having fun! TGA's mission is to empower our students with the tools to be successful on the tennis court and in life. **K-5th Grades. Class minimum: 5. Maximum: 22.**

Young Engineers

Tuesdays, 2:30 pm - 3:30 pm, Room 2
\$373 - 12 sessions

January 14th – April 7th
No class February 18th

The objective of this course is to impart theoretical and applied knowledge in the fields of Science, Technology, Mechanical Engineering, and Mathematics (STEM) by using LEGO® and other exciting tools. The main goal is to illustrate content through stories and demonstrations. Students will learn mathematics and physical principles through intuitive study; develop their independent learning; and improve their building skills. Once the concepts have been demonstrated, students enjoy hands on building the LEGO® models which provides experiential learning and reinforces the lessons.

Theme this session: Transportation & Aviation

Powers and principles in physics: Newton's first law (law of inertia) and third law (action-reaction law), transmissions, chain and snail transmission, kinetic energy, potential energy, lift force and law of conservation of angular momentum.

Models built in class: Racecar, Motorcycle, Balloon car, Tow truck, Rescue helicopter, Sand buggy and many more!!

Famous scientific and philosophical figures: Sir Isaac Newton, Daniel Bernoulli
1st-5th Grades Only. Class minimum: 12. Maximum: 16.
